

Expert Witness Consulting Services, LLC

- EWCS works with litigators, mediators and lawyers representing Special Committees and other “high conflict” attorneys by providing Professional Experts with in-depth expertise and analytical resources in selected domains, or “silos”. These best-in-class resources deliver exceptional results to law firms and/or their or our clients, enabling an advantageous resolution of the matter at hand.
- Today, a preponderance of law firms and their clients seek Experts from Directories which can be a haphazard approach at best.
- We’ve done all that job for you because our Experts at Expert Witness Consulting Services, LLC (“EWCS”) are carefully selected and supported and engaged where they are the best fit for the client’s needs. Many of our Professionals have extensive hands-on experience as C-level executives in the areas of their expertise. Their expertise has come from situations very similar to that of the Client’s which distinguishes them from academic Experts.
- EWCS is affiliated with Gordian Group, LLC (“Gordian”), a leading investment banking firm in the restructuring field, allowing EWCS to benefit from the various resources under the Gordian umbrella.

Breadth of Experience

The EWCS professionals have substantial experience in most industries, including but not limited to aerospace and defense; consumer goods; electronic technology; finance and insurance; food and beverages; heavy industry and manufacturing; life sciences; metals & mining; oil & gas and energy; real estate and hospitality; and retail and apparel. Our experts have done transactions within these segments, and use their “real world” experience in approaching the projects.

In addition, our professionals are well-accustomed to working with spotty or incomplete data, including in situations where all historical information may be suspect due to fraud and requiring forensic accounting. Our analytical work product frequently deals with issues relating to damages, various approaches to valuation, solvency and debt capacity, fraudulent conveyance, and “what if” analyses (particularly in cases where there has been an alleged breach of duty). Our years of experience also allow us to opine on what reasonably prudent actors should have done in a given situation.

In short, our breadth of experience gives us significant advantages in perspective and credibility vs. experts that approach the world primarily from a theoretical valuation standpoint.
